Bring your KNX devices to Matter...

Control all smart home devices in the app of your choice.

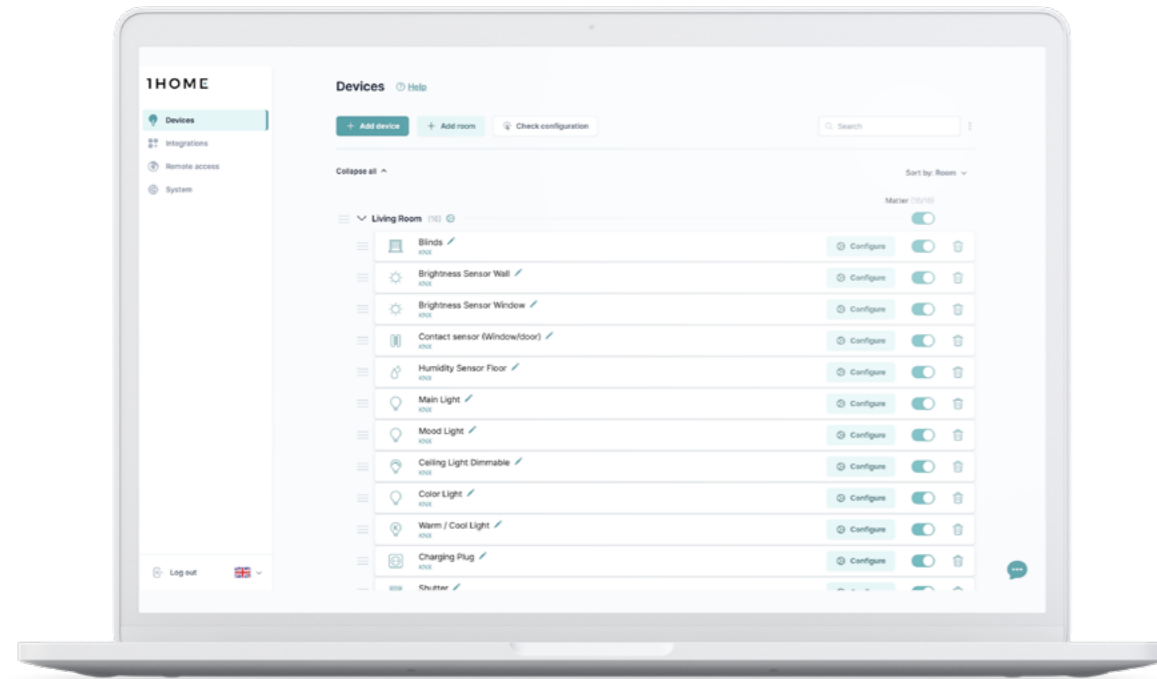

The two leading smart home standards, connected.

1Home Server enables you to bring KNX and Matter devices under one roof.

...and to any Matter-enabled smart home app on the market.

Local Dashboard.

Manage all devices (KNX, Matter, IoT) in one place

Automatically configure projects from ETS files*

Detect and fix setup mistakes automatically

Manage remote control access

Reuse configurations across different projects

Local & Private connection, no Internet required

LIGHTSPEED & FAILPROOF SETUP

Set up your configuration automagically.

ETS file

Automatic ETS Detection

Setup complete

It's not magic. But it sure works like it.

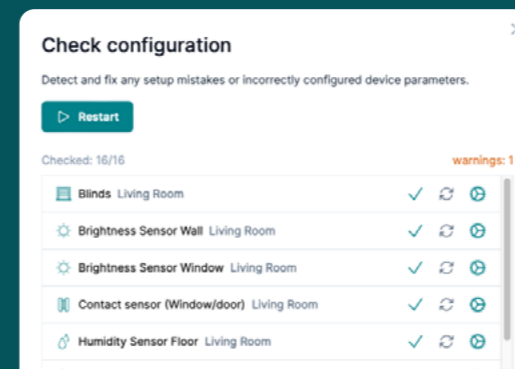

Import and construct devices such as lights, blinds, sensors, etc. automatically from your .knxproj file or 1Home Bridge config.

No need to type in hundreds of group addresses and linking them with physical devices.

FAILPROOF

No error is safe from Automatic Issue Detection.

Detect and fix any setup mistakes or incorrectly configured device parameters.

1HOME COMPANION APP FOR iOS

Seamlessly sync your configuration to Apple Home.

Instead of manually allocating devices to the correct rooms in Apple Home, the Companion app automatically performs this monotone task. The app also indicates when there are any differences between the two configurations and lets the user know before the sync changes will be made.

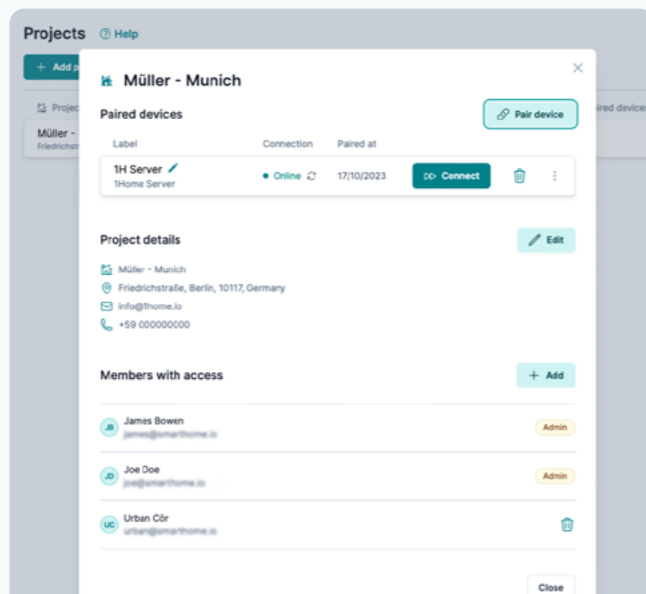

Remote Dashboard.

**Program KNX securely via ETS
- from anywhere in the world.**

Business dashboard

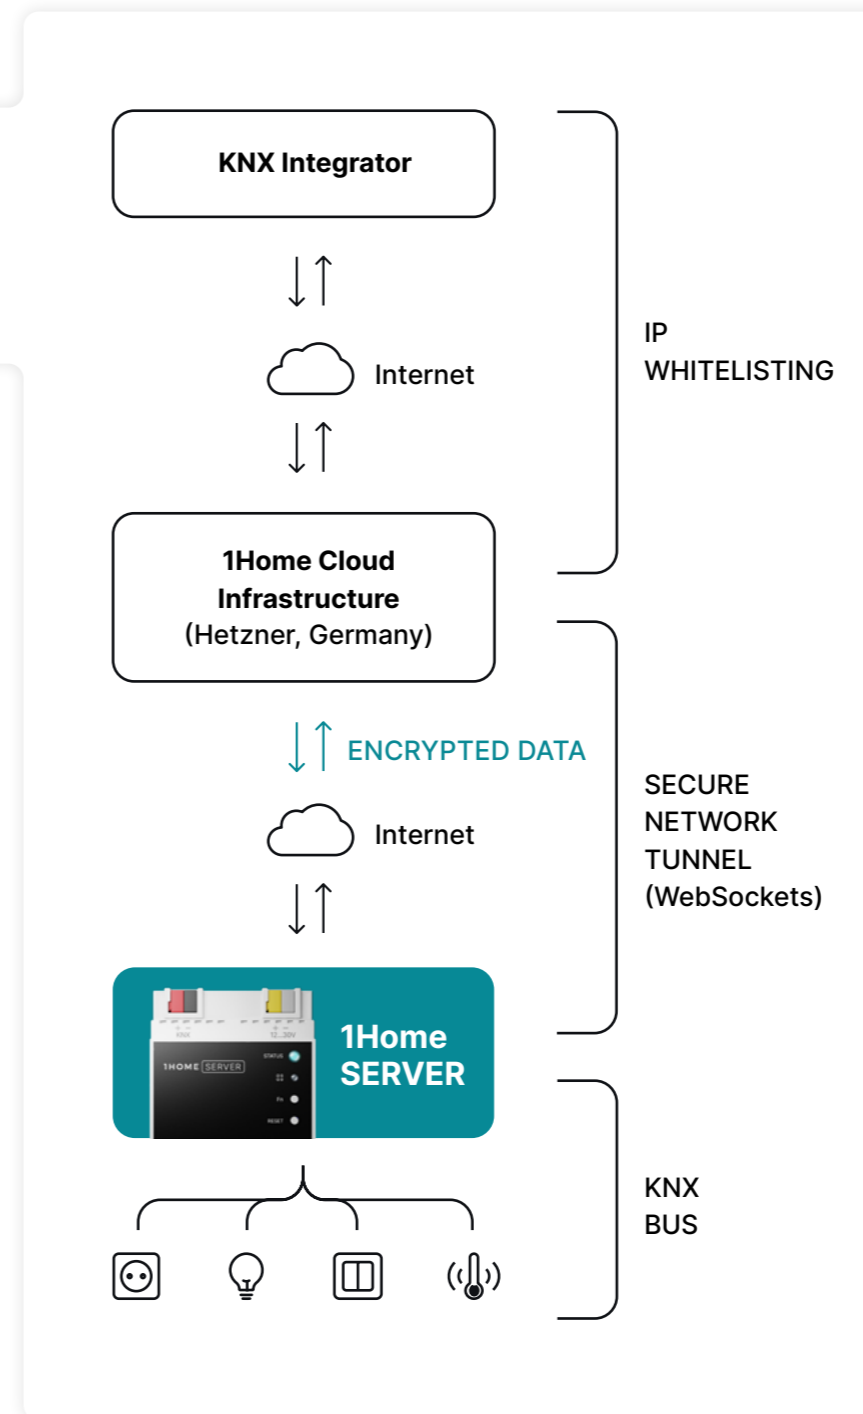

- Keep a clear overview of all your company projects
- Easily assign employees to projects
- Manage multiple projects across employees

1Home Partner Shop

Access the shop directly from the Remote Dashboard and effortlessly keep up with your expanding project demands.

Secure remote ETS access.

Connect without VPN

Secure and quick connect enabled by IP whitelisting.

Connect securely with a tunnel connection

Secure network tunnel established by websockets.

Auto-Disconnect for your peace of mind

Set the time span after which the tunnel automatically turns off.

Servers located in Germany

Subject to German Data Protection Law.

Works with any ISP

Use with any internet service provider and with any router (LTE or landline, IPv4).

Unlimited data volume per month

Complex logic made simple.

Make smart homes truly smart. Create advanced automations effortlessly, with no ETS knowledge required. All running locally.

Triggers

Set rules for when certain automations should start.

Repeat

Repeat anything multiple times.

Actions

Configure desired actions on any device.

Transform & Calculate

Calculate or create new values based on system data.

Conditions

Make sure the conditions are met.

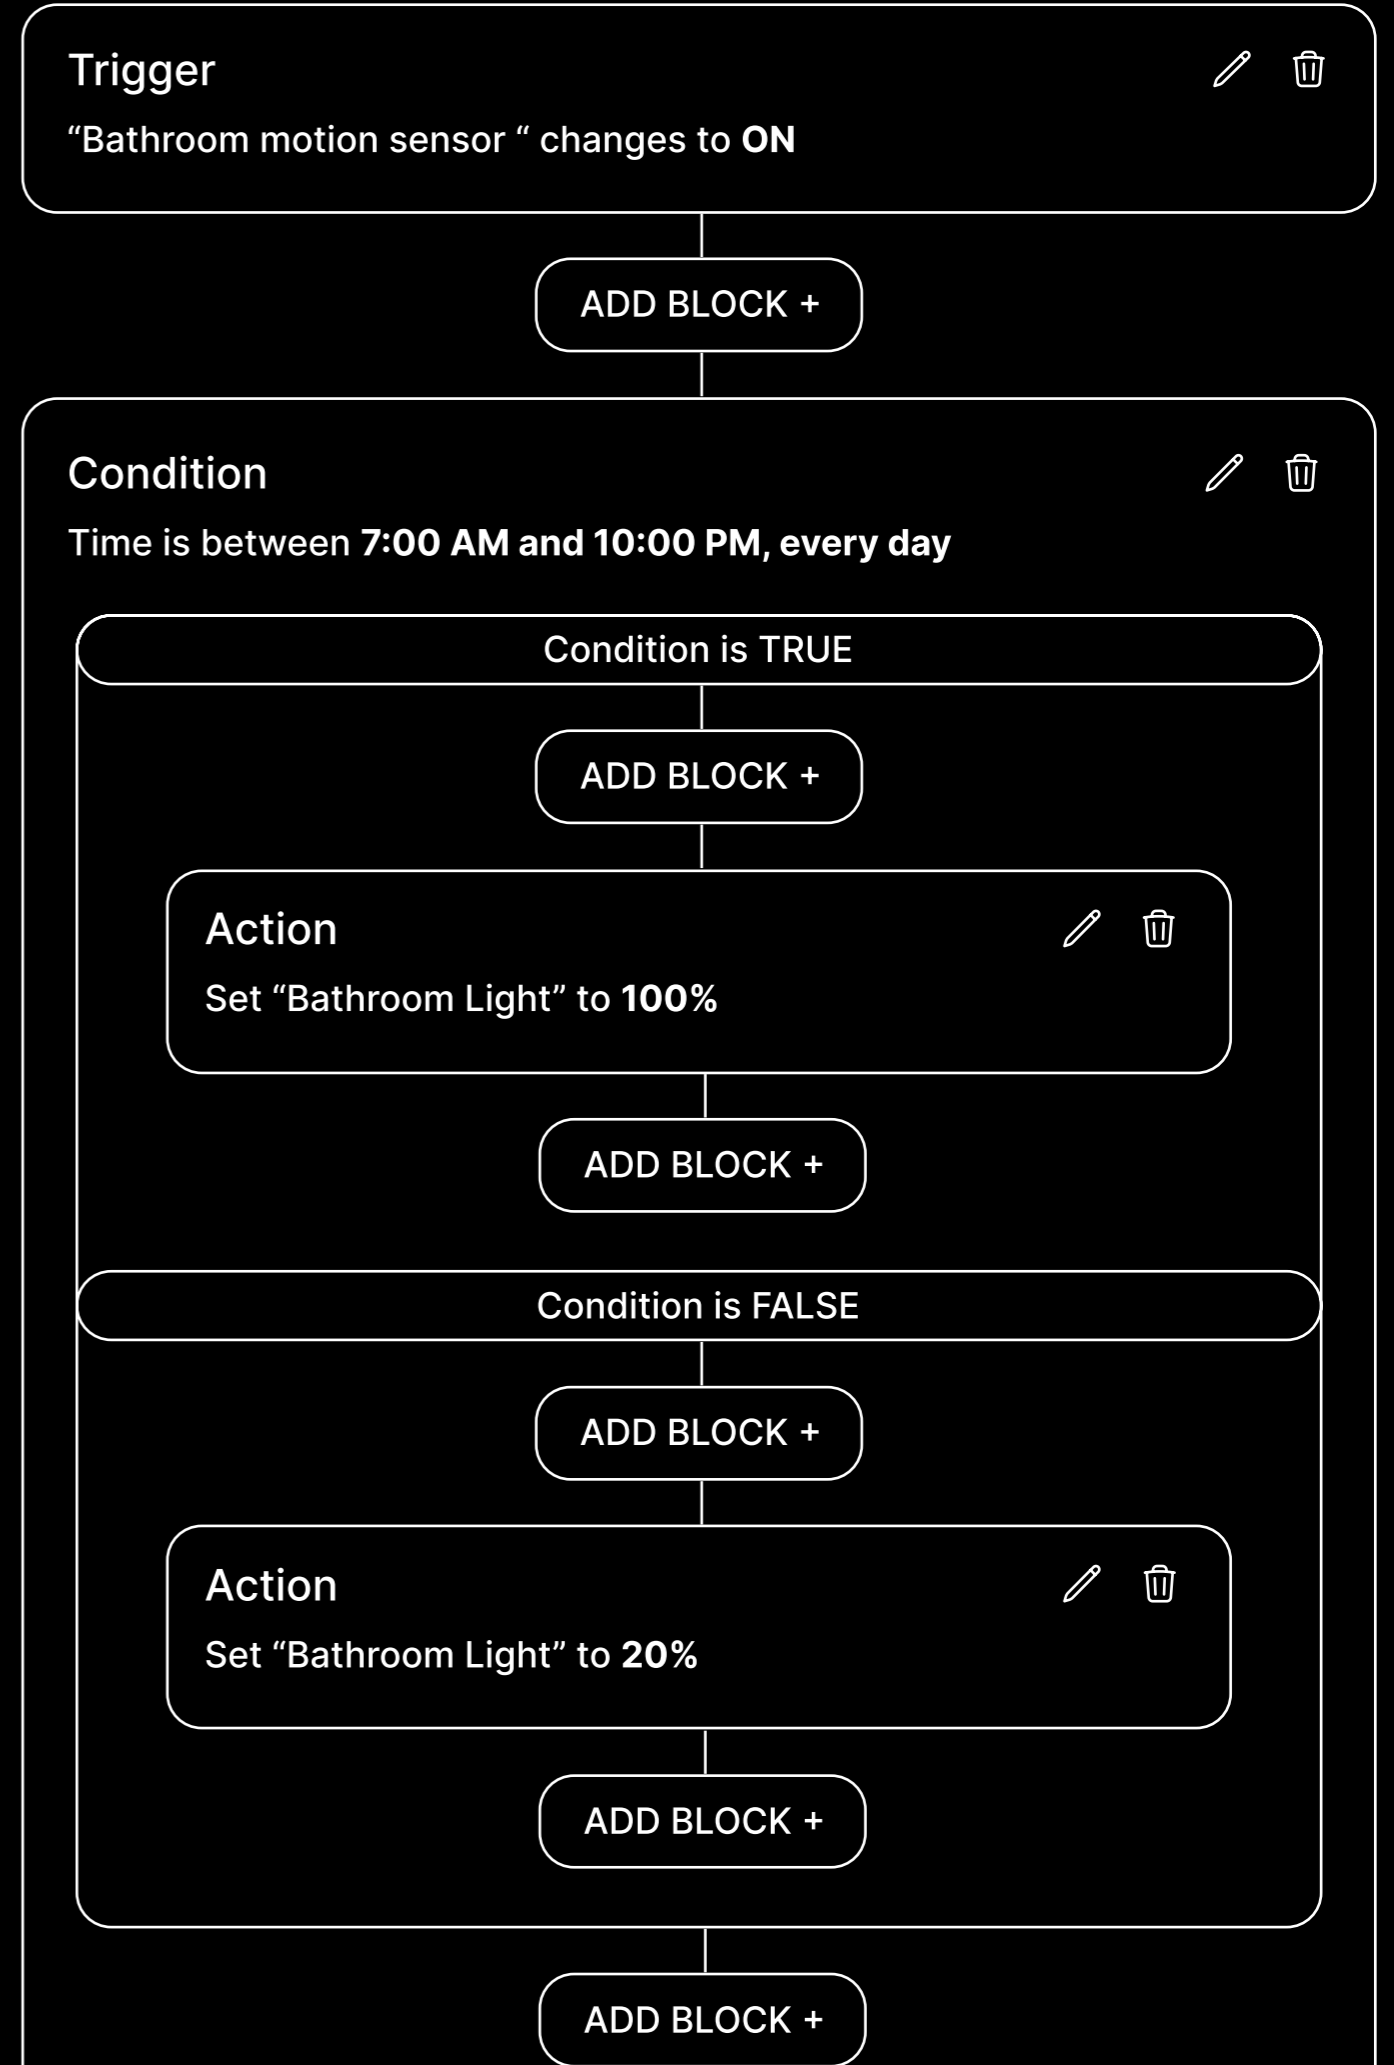

Delays

Define time periods between conditions or actions.

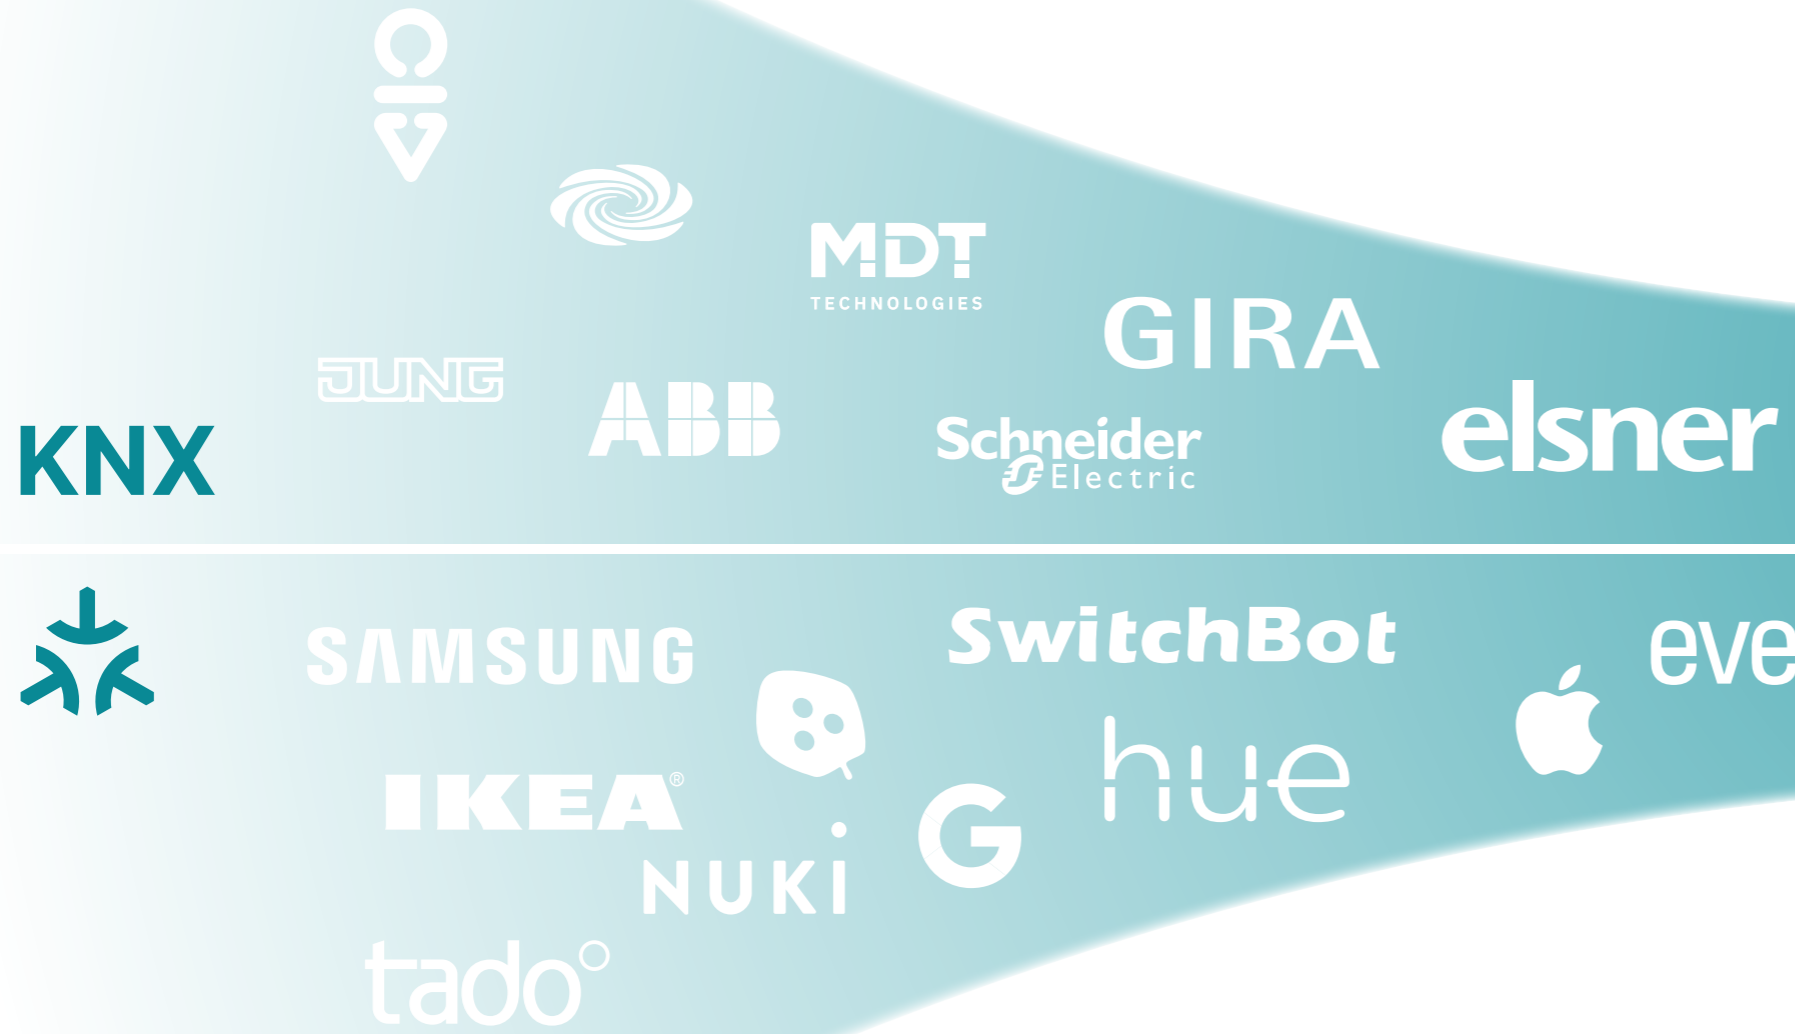

Notifications

Send different kinds of notifications to the installer or the customer.

The power of Server for all.

Use secure remote access, logic module, advanced dashboard tools, and all the other features of the 1Home Server with any Matter or KNX smart home device.

Bring 100s of Matter devices to 1Home.

And control them from a singular dashboard along all your KNX devices.

Include retrofit projects into your portfolio.

Increase your customer base by bidding on any smart home project - new or retrofit.

Upsell IoT-Matter to your customers.

Enable control of Matter devices with KNX pushbuttons and sensors (and vice versa).

We are here for you.

Navigating the smart home seas can be sometimes daunting. That is why great support for our partners is one of our biggest priorities.

Responsive chat support. We strive to resolve all support tickets within a few hours.

Phone support. Partners get direct phone contact, and can expedite the support process when on-site.

Book ahead. Do you have important questions or a complex project involving 1Home products ahead of you? Book a dedicated live support time slot, and get the support you need.

Knowledge library. We provide an up-to date documentation for all our products, where you can learn more about set up, operation, or solving potential issues.

With 1Home,
anyone can enjoy
a smart home.
